SUMMARY

Full-stack developer who turns ideas into real, working products — not just prototypes. Started with a certified HTML/CSS/JavaScript program at ITI and have since built and shipped five full-stack applications end-to-end: React & TypeScript front ends, Node.js/Express backends with MongoDB or PostgreSQL, real authentication, and automated tests. Every project ships with a live demo and a public repository. Available for freelance and contract work.

SKILLS

FRONTEND

React, Next.js, TypeScript, JavaScript, Tailwind CSS

BACKEND

Node.js, Express, REST APIs

DATABASE

MongoDB, PostgreSQL

TOOLING

Git, Vitest, Vercel

EXPERIENCE

Frontend Developer — Self-employed

Jul 2025 – Feb 2026

Designed, built and deployed full-stack web applications for independent projects — from UI implementation through backend APIs, database schema design, authentication and testing.

PROJECTS

Dar Al-Asalah — dar-al-asalah.vercel.app

Full-stack Arabic (RTL) e-commerce for coffee, oud & perfume — real auth, MongoDB-backed orders, admin dashboard.

React · TypeScript · Node.js/Express · MongoDB

Auratech Store — auratech-store.vercel.app

Premium e-commerce storefront with a real Postgres backend, bcrypt + JWT auth, and server-verified checkout.

React 19 · TypeScript · Postgres · Drizzle · Vitest

NexaCommerce — nexacommerce-alpha.vercel.app

Full-stack MERN marketplace with a Node.js/Express API and MongoDB Atlas, deployed as Vercel Functions.

React · Node.js · Express · MongoDB

IndustryOS Dashboard — industryos-dashboard.vercel.app

Real-time industrial analytics dashboard with animated Recharts visualizations and code-split routes.

React · Recharts

Luminous — luminous-landing.vercel.app

Bold neo-brutalist fintech landing page with strict TypeScript and a full Vitest test suite.

React 19 · TypeScript · Vitest

EDUCATION

Sinai University

CERTIFICATIONS

Front-End Web Development

HTML, CSS, JavaScript

Information Technology Institute (ITI) · May 2025
